TITLE : PALATINIT-CONTAINING FOOD

ABSTRACT : PROBLEM TO BE SOLVED: To obtain a food suppressible under cortex decalcification on a tooth surface under high safety by including palatinit and a calcium salt of an organic acid such as calcium lactate.

SOLUTION: This food contains palatinit and a calcium salt of an organic acid at least one kind selected from a group comprising calcium lactate, calcium gluconate, calcium glycerophosphate and calcium pantothenate. Preferably, the food further contains a salivation accelerating base agent. A formulation of the food is preferably selected from a group comprising a troche, chewing gum, a tablet, a chewable tablet, candy and gumi candy.
